

### **Data processing during website operation**

The Company has its own website, available at [https:// http://www.wing.hu/](https://http://www.wing.hu/). The website uses automated data collection (cookies, Google Analytics, etc.).

Log-in to and log-out from the website is facilitated by the use of small data packages, so-called cookies, which are placed on your IT devices and read by the website. Cookies are designed to enable the proper functioning of the website, a more efficient service provision and statistical, anonymised data collection.

They can be deleted by the visitor from their IT device, or are automatically deleted when closing the browser, or their use can be blocked by the visitor by manually changing browser settings. The website can still be used by the visitor even if they have otherwise blocked the use of cookies by manually changing browser settings.

The website uses unique, temporary, so-called 'session' cookies to identify workflows, in other words, to determine whether the visitor has logged in to the website or not. These 'session' cookies, therefore, facilitate log-in to and log-out from the website for visitors. They are temporary cookies that are automatically deleted from the visitor's IT device once the browser is closed, or can be deleted by the user manually using the browser settings.

The cookies below are used to collect the following statistical data as well as data related to visits to the website and website usage:

- whether the visitor accessed the website using a search engine, through a keyword or via a hyperlink ('utmz' cookies),
- how many times the visitor has visited the website ('utmb' cookies),
- how much time the visitor has spent on the website ('utma' and 'utmv' cookies),
- when the visitor first visited the website ('utma' and 'utmv' cookies), and
- when the visitor last visited the website ('utmc' and 'utmv' cookies).

In addition, certain cookies protect the website from overload ('utmt' cookies), while certain cookies used by Google Analytics also track the IP address of the IT device used by the visitor for analytical, statistical and security purposes. Data are stored on the visitor's IT device.

The independent metering and auditing of the usage and other web analytics data of the website are, therefore, enabled by the Google Analytics servers (as an external service provider) using the above cookies. Detailed information on the processing of these metering data are provided by the controller of these data at <https://www.google.com/analytics/>, while further information on Google's privacy policy is available at: <https://policies.google.com/privacy>. The data transferred from the website to the Google Analytics servers are not directly suitable for identification of a given visitor, and only allows identification of the IP address of the IT device used.

**purpose of data processing:** visitor data are tracked by the service provider during the visit to the website to monitor functioning of the service and prevent misuse.

**scope of data processed:** date, time, the IP address of the user's computer, the URL of the site visited, the URL of the site previously visited, data related to the user's operating system and browser

**legal basis for data processing:** data subject's consent as per Article 6 (1) of the GDPR and Section 13/A (3) of Act CVIII of 2001 on Certain Issues of Electronic Commerce Services and Information Society Services

**duration of data storage:** 30 days from visit to the website

**method of data storage:** electronic

You may request provision of information on the processing of your personal data, as well as rectification and erasure of your personal data - with the exception of data processing as required by law - in the manner indicated during data recording, by contacting the controller using the specified contact details.

Data subjects may seek legal remedy or lodge complaints with the Hungarian National Authority for Data Protection and Freedom of Information (1125 Budapest, Szilágyi Erzsébet fasor 22/C) or the district court with competence as per the data subject's permanent or temporary place of residence.
